

**In between games - not the last game of the night**

1. Remove the bases AND install all base plugs. If the magnetic portion of the base doesn't come out get a tool out of the shed or cage and remove it.
2. Drag the field in small circles starting from the outfield and working back towards the middle.
3. Water the field for 3-5 minutes.
4. Chalk the field.
5. Re-install the bases.
