

### After last game of the night

1. Remove the bases AND install all base plugs. If the magnetic portion of the base doesn't come out, get a tool out of the shed or cage and remove it. These are expensive and need to be locked up.
2. Drag the field in small circles starting from the outfield and working back towards the middle.
3. Lock the mound, bases, base plugs, and any other gear on the field in the first base dugout.
4. Turn on the sprinklers.

### While the sprinklers are running.

Pack up the cart and drive it out to the score board and flag area.

5. Take down the flag.
6. Turn off the score board.
7. Put the cart away and lock the shed.
8. On your way back from the shed, **turn off the water valves**. It is okay if they are running for 5+ minutes. Standing water on the field is acceptable; flooding is not.

# Closing Maintenance
