

## WEATHER POLICY

### **PRACTICE DAY ONLY** Cancellations Due To Weather

Unless the weather is severe (lightning, heavy rain) or the field conditions are too poor (standing water) and the field is closed, we do play in light rain. Lightning or heavy rain will result in cancellation.

Lightning in the area (within 10 miles) will result in cancellation. We recommend the **weather bug cell phone app**. It has a feature called SPARK that tracks lightning.

### **GAME DAY RAIN OUT OR CANCELLATION PROCESS:**

Unless the weather is severe or the field conditions are too poor (standing water) and the field is closed, we do play in light to moderate rain. Heavy rain and lightning will result in delay or cancellation.

Lightning in the area (within 10 miles) will result in a 1/2-hour delay (after last observed strike). In order to keep the schedule as true as possible for teams and games that follow, lightning delays will always consume current game time versus push games out.

When in doubt, assume we WILL PLAY. But here are the steps we will follow for Saturday and Sunday games, please be sure to monitor your GameChanger "Messages" (or preferred communication method of your coach) the evening prior and day of for any and all decisions related to inclement weather.
